PROFESSIONAL SUMMARY

Business Analyst and soon-to-be Honours BTech Software Development graduate with Ontario Public Service co-op experience supporting service intake, stakeholder coordination, governance, portfolio reporting, and process improvement. Brings hands-on strengths in requirements discovery, Jira and Confluence, Power BI, Excel, SQL, KPI reporting, data validation, and translating operational needs into practical technology and process solutions. Motivated by public-service work that improves how people access and experience government services.

BUSINESS ANALYSIS & TECHNICAL SKILLS

Business Analysis: requirements elicitation, stakeholder interviews, process mapping, gap analysis, root-cause analysis, user stories, acceptance criteria, solution options, business cases, requirements traceability

Delivery & Governance: Agile/Scrum ceremonies, service intake, project coordination, action and decision logs, risk and issue tracking, escalation, MBR/QBR support, executive updates, change and release documentation

Data & Reporting: Power BI, DAX, Excel, SQL, KPI design, data validation, data quality, dashboard development, trend analysis, reporting, data visualization

Tools & Technology: Jira, Confluence, SharePoint, Microsoft 365, Teams, Visio, Figma, Git/GitHub, React/TypeScript, Node.js, REST APIs, SQLite, cloud computing

PROFESSIONAL EXPERIENCE

Business Analyst Intern (Co-op)

Jan 2026 – Apr 2026

Ontario Public Service (OPS) – GovTechON, Customer Relationship Management Branch

Toronto, ON

- Coordinated Monthly and Quarterly Business Reviews and governance meetings by consolidating business and delivery-team input, preparing presentations, and maintaining clear notes, actions, and decisions, giving senior stakeholders a reliable view of priorities and follow-up commitments.
- Reviewed incoming service requests, identified incomplete or misdirected submissions, and followed up with requestors in Jira and Confluence; improved intake quality and reduced avoidable handoffs by clarifying requirements early.
- Maintained Account Plans and trackers for initiatives, priorities, dependencies, risks, resource needs, and upcoming demand; enabled more consistent account planning and executive-level portfolio discussions.
- Reconciled and validated more than \$1M in initiative, resource, invoice, recovery, and approval records, strengthening the accuracy of capacity, demand, and financial-governance reporting.
- Enhanced a CRM Operational Plan Power BI dashboard by refining DAX measures, validating source data, defining KPIs, and documenting release logic; improved reporting consistency and decision support for leadership.
- Analyzed ticket misdirection and service-request patterns for a cross-functional LEAN initiative, identified root causes and information gaps, and recommended a standardized triage approach to reduce rework and process inefficiency.

UI/UX Designer (Co-op)

May 2025 – Aug 2025

Inspired Technologies & Business Solutions Inc.

Toronto, ON

- Facilitated client discovery and captured stakeholder priorities, requirements, and decision notes; translated findings into user flows, wireframes, and implementation-ready Figma designs that gave delivery teams a clearer shared direction.
- Completed competitor and market analysis and connected findings to client needs and usability considerations, strengthening solution recommendations and project communication.

BUSINESS ANALYSIS & DATA PROJECTS

<u>DataTrust - Enterprise Data Quality & Metadata Platform</u>	Jul 2026
• Defined business and technical metadata, data-quality rules, ownership, source-to-target mappings, lineage, and requirements traceability for a synthetic enterprise dataset; made data controls and downstream impact easier for analysts and data stewards to review. • Built a Python, SQL/SQLite, FastAPI, and React solution that profiles data and surfaces quality findings through an auditable dashboard; converted raw validation evidence into practical reporting for decision-making.	

<u>OpsResilience Automation Lab</u>	Jun 2026
• Designed policy-driven incident classification, recovery, escalation, audit-trail, and resilience-reporting workflows; produced measurable operational metrics including MTTR, automation success rate, incident trends, and DR validation results.	

<u>Schedulify - Intelligent Timetable Management</u>	Aug 2025
• Gathered and analyzed scheduling rules, stakeholder needs, and capacity constraints, then delivered automated clash detection, recurring assignments, role-based timetable views, persistent storage, and PDF reporting; reduced manual timetable-planning effort by an estimated 80%.	

EDUCATION

Honours Bachelor of Technology – Software Development	Expected Aug 2026
<i>Seneca Polytechnic GPA: 3.6/4.0</i>	<i>North York, ON</i>
• Relevant Coursework: Database Systems, Software Architecture, Cloud Computing, Data Structures and Algorithms	

ACHIEVMENTS

SecureSync – AI Governance Case Competition (2nd Place)	Apr 2026
<i>Microsoft Purview Copilot Information classification Security controls Executive communication</i>	
• Co-developed and presented a \$1.5M, three-year secure AI governance proposal to senior OPS leaders; evaluated implementation, information-classification controls, security risks, financial considerations, and organizational value.	
President’s Honour List (Two-Time Recipient)	
• Recognized by Seneca Polytechnic for outstanding academic performance, including a 4.0 GPA in Winter 2025.
